
Plan Overview

A Data Management Plan created using DMPonline

Title:

Creator:

Principal Investigator: z

Project Administrator: z

Affiliation: Other

Funder: Luxembourg National Research Fund (FNR)

Template: DCC Template

Project abstract:

The project aims to investigate the impact of climate change on the distribution of species in the
 North Atlantic region. The study will focus on the distribution of marine species, particularly
 fish and shellfish, and will involve a combination of field observations and laboratory
 experiments. The project will also involve the development of a model to predict the
 distribution of species under different climate change scenarios. The project is funded by
 the Luxembourg National Research Fund (FNR) and is part of a larger programme of
 research on climate change and its impact on the environment. The project is led by
 Dr. [Name] and is supported by a team of researchers from the University of
 Luxembourg and other institutions. The project is expected to run from 2026 to 2027.

- Geological data
Geological data
- Geological data
- Geological data

How will the data be collected or created?

Geological data
EPMA
SEM
XRF
ICP-MS

Documentation and Metadata

What documentation and metadata will accompany the data?

1. Geological data
 - Geological data
 - Geological data
 - Geological data
2. Geological data
 - Geological data
3. Geological data
 - Geological data
 - Geological data

Ethics and Legal Compliance

How will you manage any ethical issues?

Geological data

How will you manage copyright and Intellectual Property Rights (IPR) issues?

Geological data

Storage and Backup

How will the data be stored and backed up during the research?

□□□□□□□□□□□□

How will you manage access and security?

□□□□

Selection and Preservation

Which data are of long-term value and should be retained, shared, and/or preserved?

□□

What is the long-term preservation plan for the dataset?

□□□□□□□□

Data Sharing

How will you share the data?

□□□□□□

Are any restrictions on data sharing required?

□□

Responsibilities and Resources

Who will be responsible for data management?

□□

What resources will you require to deliver your plan?

□□□□□□□□□□□□□□□□□□

Planned Research Outputs

Data paper - "Apatite crystallization and growth in the presence of water"

- Abstract: "Apatite crystallization and growth in the presence of water"
- * Apatite crystallization and growth in the presence of water ~187 Ma
 - * Apatite crystallization and growth in the presence of water F₁₀₀A₁₀₀A₁₀₀
 - * Apatite crystallization and growth in the presence of water U-Pb/Ar-Ar/Ar-Ar ~185-187 Ma
 - * Apatite crystallization and growth in the presence of water Hf-Nd
2. Apatite crystallization and growth in the presence of water
- * Apatite crystallization and growth in the presence of water
 - * Apatite crystallization and growth in the presence of water An₁₀₀<10
 - * Apatite crystallization and growth in the presence of water SiO₂/K₂O+Na₂O/Fe/Mg/Ba/Sr/Eu
 - * Apatite crystallization and growth in the presence of water Sn/W/F/Li
3. Apatite crystallization and growth in the presence of water
- * Apatite crystallization and growth in the presence of water "Apatite crystallization and growth in the presence of water"
 - * Apatite crystallization and growth in the presence of water ~190-180 Ma
 - * Apatite crystallization and growth in the presence of water
